

Unimplemented function in draft 1

Jiuhong Du
A1762017

- 1, the aggregation server is persistent.
2. Realize failure recovery.
3. The system is fault-tolerant
4. Local testing
5. Comprehensive testing
6. You don't provide any README files that explain how to compile and run your project. You should provide a detailed description of what you did and how you did it, what the requirements for your project were, and how it should be tested in the final version

After two weeks of modifications and additions, I have made changes and additions to the following content.

- 1, Add README file to help Marker understand my program design.
- 2, Change the test file to list each test separately.
- 3, Making the aggregation server persistent.
- 4, The fault-tolerant function of the system is realized.
